

# SPI Technogrants

The SPI Technogrants offer funding for the **development and testing of technologies** relevant for research in polar and remote high-altitude regions.

Scientists of **all career stages** – from Master's students to senior researchers – are eligible to apply if they are affiliated with a Swiss public research institution.

Collaborations with **private companies and start-ups** are encouraged.

Calls for proposals are **issued annually** by the Swiss Polar Institute. SPI Technogrants are made possible thanks to funding provided by the Swiss Polar Foundation.

**SWISS POLAR  
INSTITUTE**
